Rahul Satyawan Thorat

Problem Statement

Creating a web application that seamlessly integrates the ESP32's IMU with a 3D scene, enabling real-time interaction through sensor data, aiding an immersive user experience.
Components of the System

Web page	Controller
• Uses • Contains files and dependencies for 3D scene • Handles data from Controller	• Uses the built-in accelerometer of ESP32 • Connects to a device with hotspot for internet

Tech Stack

three.js

Web Bluetooth

Arduino IDE

READY?

NFS Unwanted

How to play?

Connect Device   ★   Calibrate when ready   ★   Have fun!
